*Prompt 1:

Create a roast generator in C++. Which takes name of user as input and generate a roast line with the username for that create a vector of string in which store the roast line and every time the program runs it should give a new roast line not the previous one For example: If the Input is Rahul, then the possible output can be: • “Rahul writes code so slow that even a turtle switched to Python.” • “If procrastination were an Olympic sport, Rahul would already have a gold medal.” • “Rahul’s debugging style is basically staring at the screen until the bug gets embarrassed and leaves.” Add atleast 15 20 roast line in vector

*Prompt 2:

There is a bug when the user enters his/her full name They only gets the first name it should include the last name as well

*Prompt 3:

it runs only once make it run until the user press X (Capital one only) and add a roast at exiting also.
